

Nepal Netra Jyoti Sangh
Eye Health Program-Rapti & Bahadurgunj
Dang, Lumbini Province.

ANNUAL REPORT 2025

Message from the Chairman

On behalf of the Nepal Netra Jyoti Sangh-Eye Health Program–Rapti & Bahadurgunj, I would like to express my sincere appreciation to all individuals and institutions who supported our work during 2025.

I am deeply grateful to the Norwegian Association of the Blind and Partially Sighted (NABP–Norway), Ms Kristin Kjæret, Director International, Ms Lykke E. Stavnes, Program Director for their continued and long-term support in strengthening eye care services.

I also extend my sincere thanks to the Central Nepal Netra Jyoti Sangh (NNJS) for its leadership and guidance. My appreciation goes to the NABP–Nepal Office for its close coordination and technical support. I would also like to thank LCIF, CBM, Helping Hands Health Education, Ruit Foundation, Siloam Centre for the Blind, South Korea, Ek Ek Paila, the Redli Eye Foundation, local NGOs, and organizations for their valuable financial and technical assistance.

I sincerely thank the Government of Nepal for its policy support and financial contribution, as well as the local and provincial governments for their strong cooperation in program implementation.

I would like to express my special thanks to Madam Sissel Helden for her continued encouragement and support, and to Mr Inge Sollerud, Norway, for his generous contribution to eye health services.

My heartfelt thanks go to all executive members of NNJS-Dang, ophthalmologists, doctors, paramedics, administrative staff, volunteers, and the entire management team of the Eye Health Program. Their dedication, professionalism, and hard work are the foundation of our achievements. With the continued support of our partners and the commitment of our team, we remain dedicated to providing quality eye care services and reaching people most in need.

Mr. Krishna Kumar Giri, Chairman, Hospital Management committee

Message from the Chief Ophthalmologist, and Chief Administrator

Pro.Dr Pradeep Bastola
Chief Ophthalmologist,
Eye Health Program

The year 2025 was a year of steady service delivery and important institutional progress for the Eye Health Program–Rapti & Bahadurgunj. Despite operational and resource-related challenges, the program continued to provide quality eye and ear care services through hospitals, eye care centres, and outreach activities, reaching a large number of people across our working areas. During the year, strong teamwork between clinical, administrative, and support staff helped maintain service quality and patient safety. Expansion of surgical services, strengthening of outreach programs, and continued focus on training and supervision contributed to improved access to eye care, particularly for poor and underserved communities. The year also marked key milestones for future growth. The joining of more than ten new ophthalmologists strengthened clinical capacity and continuity of services. Approval of the MD Ophthalmology program by the Medical Education Commission was a major achievement for human resource development. Construction of a new Operation Theatre with the support of the Embassy of India enhanced surgical infrastructure. In addition, Sulichaur Eye Centre (Rolpa), Rukum West, and Krishnanagar Eye Care Centre were upgraded into surgical eye centres, expanding access to surgical eye care services. We sincerely thank all ophthalmologists, staff members, volunteers, management committees, partners, and supporters for their dedication and cooperation. We also acknowledge the support of the Government of Nepal, local and provincial governments, and our development partners. With continued teamwork and shared commitment, we remain focused on improving service quality and reaching more people in need.

Dr Samsheer Thapa
Chief Administrator-
Eye Health Program

Nepal, a landlocked federal democratic republic in South Asia, lies in the Himalayan region between China and India. The country spans 147,181 sq. km and extends roughly 885 km east to west. Its geography is categorized into Mountains, Hills, and Tarai plains, accounting for 35%, 42%, and 23% of the total area, respectively. Administratively, Nepal is structured into 7 provinces and 77 districts, with 753 local government units, including 6 metropolitan cities, 11 sub-metropolitan cities, 276 municipalities, and 460 rural municipalities.

SHORT INTRODUCTION

Rapti Eye Hospital, located in Tulsipur, Dang, was established in 1986 and is situated on 4 Bigha (approximately 2.5 Acre) of land owned by Nepal Netra Jyoti Sangh. Since its establishment, the prevalence of blindness in the Rapti Zone has declined from 0.87% in 1981 to 0.13% in 2010. Initially supported by Norwegian Church Aid, the hospital later received long-term support from the Norwegian Association of the Blind and Partially Sighted. Over the years, the hospital has grown from a secondary to a tertiary-level facility, now providing comprehensive eye care services, training programs, and sub-specialty care in retina, cornea, oculoplasty, and pediatric ophthalmology.

Geta Eye Hospital (1980/81)

Rapti Eye Hospital- 1986

1980/81

1986-1998

1999 to Date

A national blindness survey conducted in 1980/81 by the World Health Organization and the Government of Nepal found that 0.84% of the population was bilaterally blind, with cataract as the main cause. This led to the launch of a blindness prevention program. With support from NORAD and later Norwegian Church Aid, a 100-bed low-cost eye hospital was established in Geta in 1981. Rapti Eye Hospital was established in Tulsipur, Dang, in 1986 with the support from Norwegian Church Aid, NCA has support till 1998. NABP support started from 1999 for the reduction of blindness and its support is continue till date.

Short Introduction about NNJS

Nepal Netra Jyoti Sangh (NNJS) is the leading national eye care providing agency for comprehensive eye care services in the country.

It was established in 1978 as the National Society for the Prevention and Control of Blindness.

There are 42 district branches of NNJS all over Nepal, 28 Eye Hospitals, and 250 plus primary Eye Care Centers are running under the umbrella of NNJS.

The Ear Care Service started in 2012

More than 15,000 volunteers are involved directly and indirectly

Nepal Netra Jyoti Sangh (NNJS) is the leading national organization providing comprehensive eye care services in Nepal. It was established in 1978 as the National Society for the Prevention and Control of Blindness. NNJS operates through 42 district branches, 28 eye hospitals, and more than 250 primary eye care centers across the country. Ear care services were introduced in 2012, and over 15,000 volunteers support its work nationwide.

The Norwegian Association of the Blind and Partially Sighted

Short Introduction about NABP-Norway

Norwegian Association of the Blind and Partially Sighted (NABP), a Norwegian International Non-Governmental Organization (INGO), established in September 1900 as a non-profit-making, secular, non-political self-help organization. This organization works towards full participation and equal rights for blinds and Partially Sighted People. Its primary objectives are to support the strengthening of organizations of the Blind at the national level through making them self-reliant, strong and sustainable, to combat blindness through eye health programs and to promote and support the rehabilitation of blind and partially sighted people. It has been supporting Blind and Partially Sighted people of Nepal in partnership with Nepal Netra Jyoti Sangh (NNJS) and Nepal Association of the Blind (NAB). It has also been programmed in other developing countries.

Rapti Eye Hospital -1986

CKN Eye Hospital - 2004

Lamahi Eye Hospital - 2012

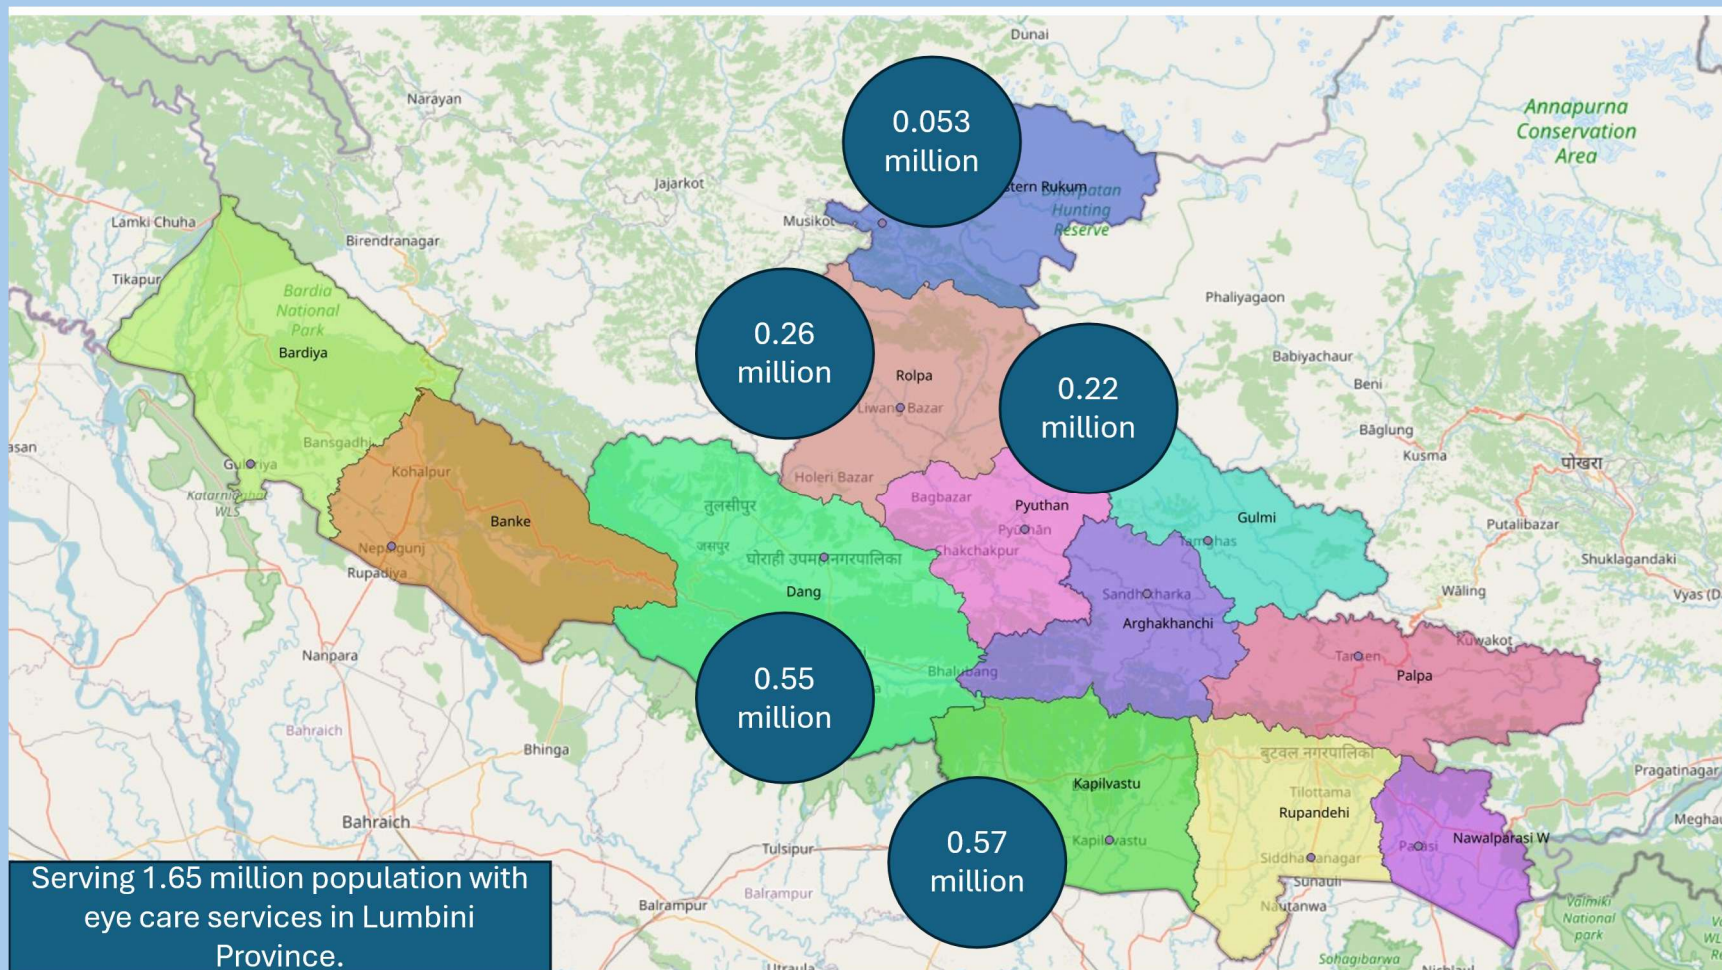

Under Rapti Eye Hospital, there are two eye hospitals: **Chhanda Kalebabu Narayani Eye Hospital and Lamahi Eye Hospital.**

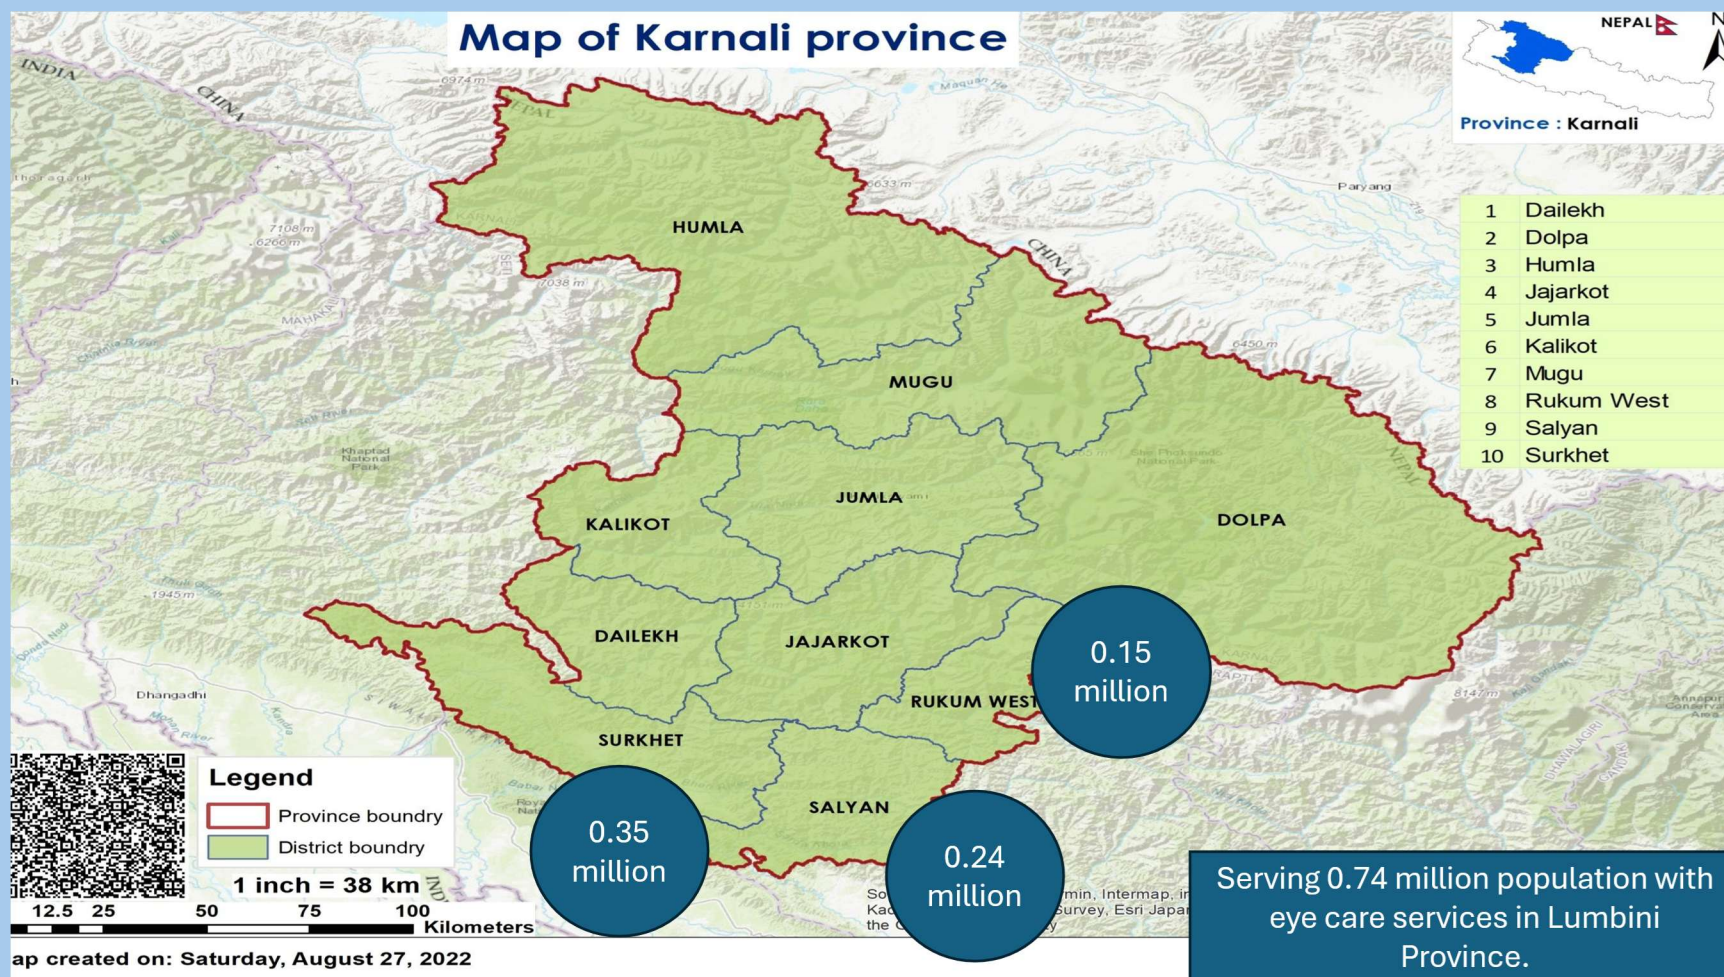

The Eye Health Program–Rapti and Bahadurgunj governs all three eye hospitals. Under Rapti Eye Hospital, there are five Eye Care Centers (ECCs), under Chhanda Kalebabu Narayani Eye Hospital there is one ECC, and under Lamahi Eye Hospital there are five ECCs.

Program Coverage & Location

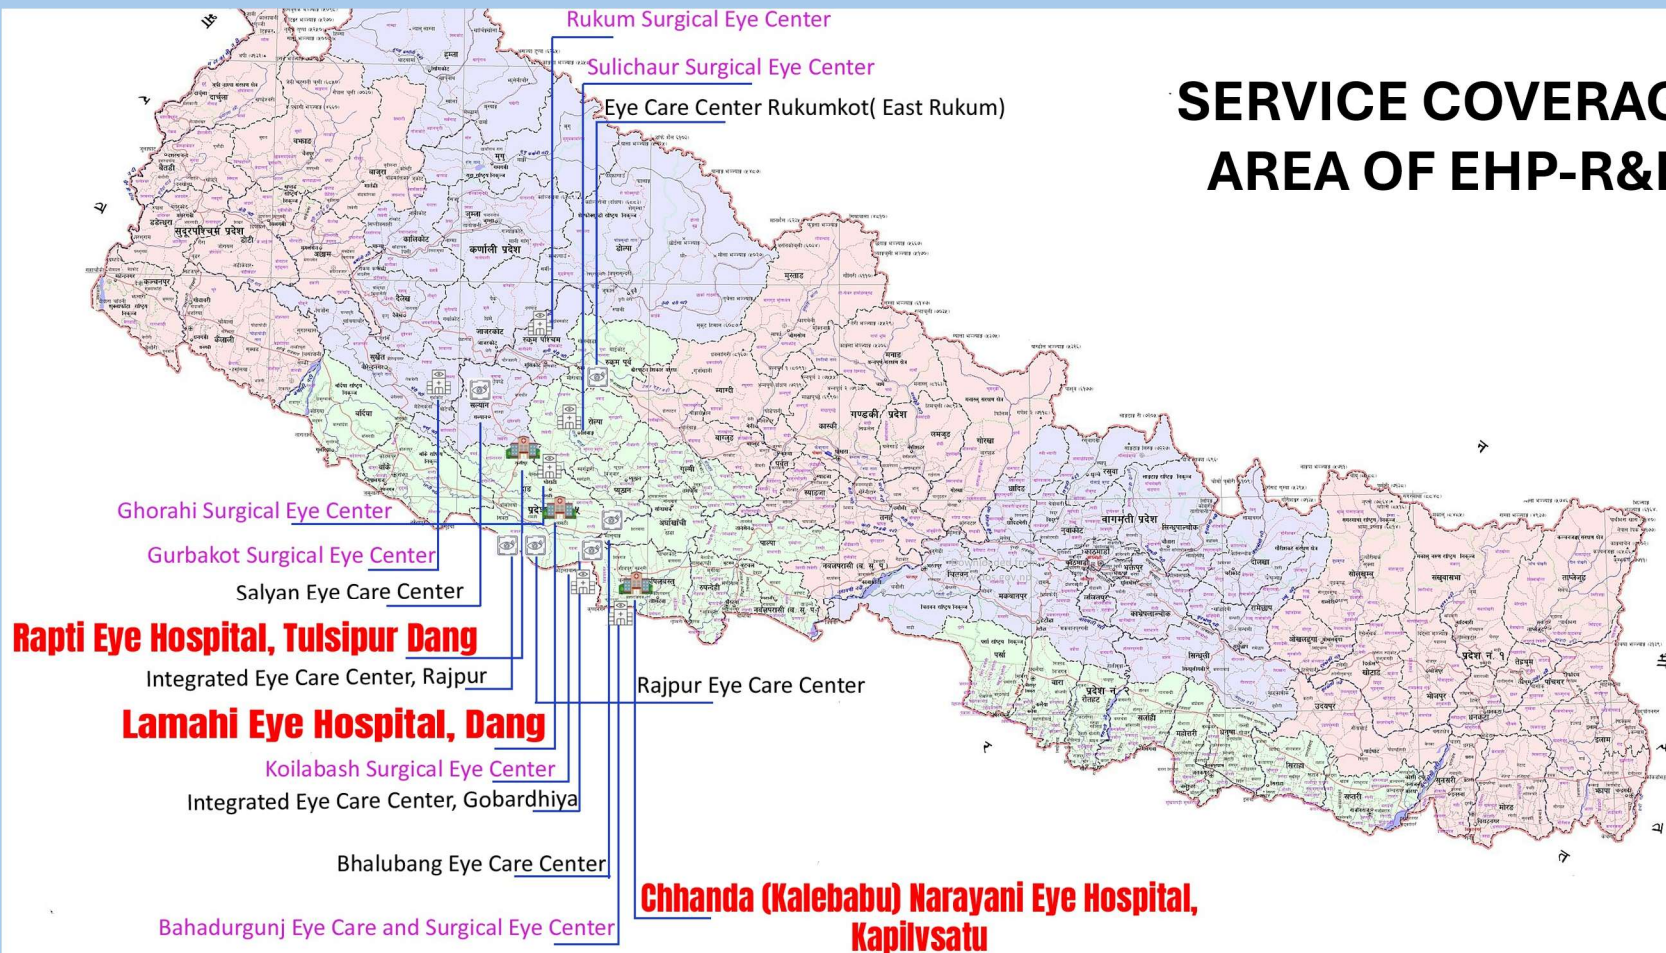

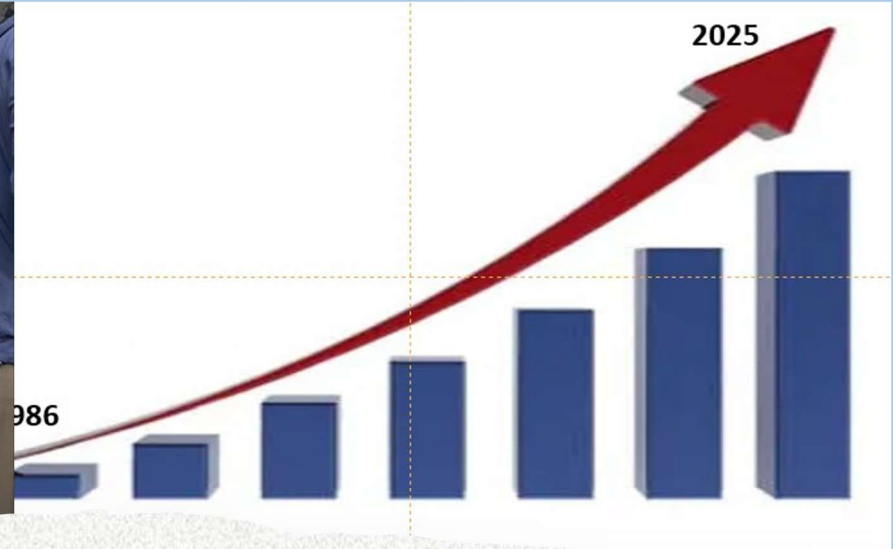

In Lumbini Province, the Eye Health Program-Rapti & Bahadurgunj covers five districts and has access to a population of about 1.65 million, including Dang (0.55 million), Kapilbastu (0.57 million), Rolpa (0.26 million), Pyuthan (0.22 million), and Rukum East (0.053 million).

In Karnali Province, the Eye Health Program has access to a population of about 0.74 million, including Surkhet (0.35 million), Salyan (0.24 million), and Rukum West (0.15 million).

SERVICE COVERAGE AREA OF EHP-R&B

ACHIEVEMENT

EYE CARE

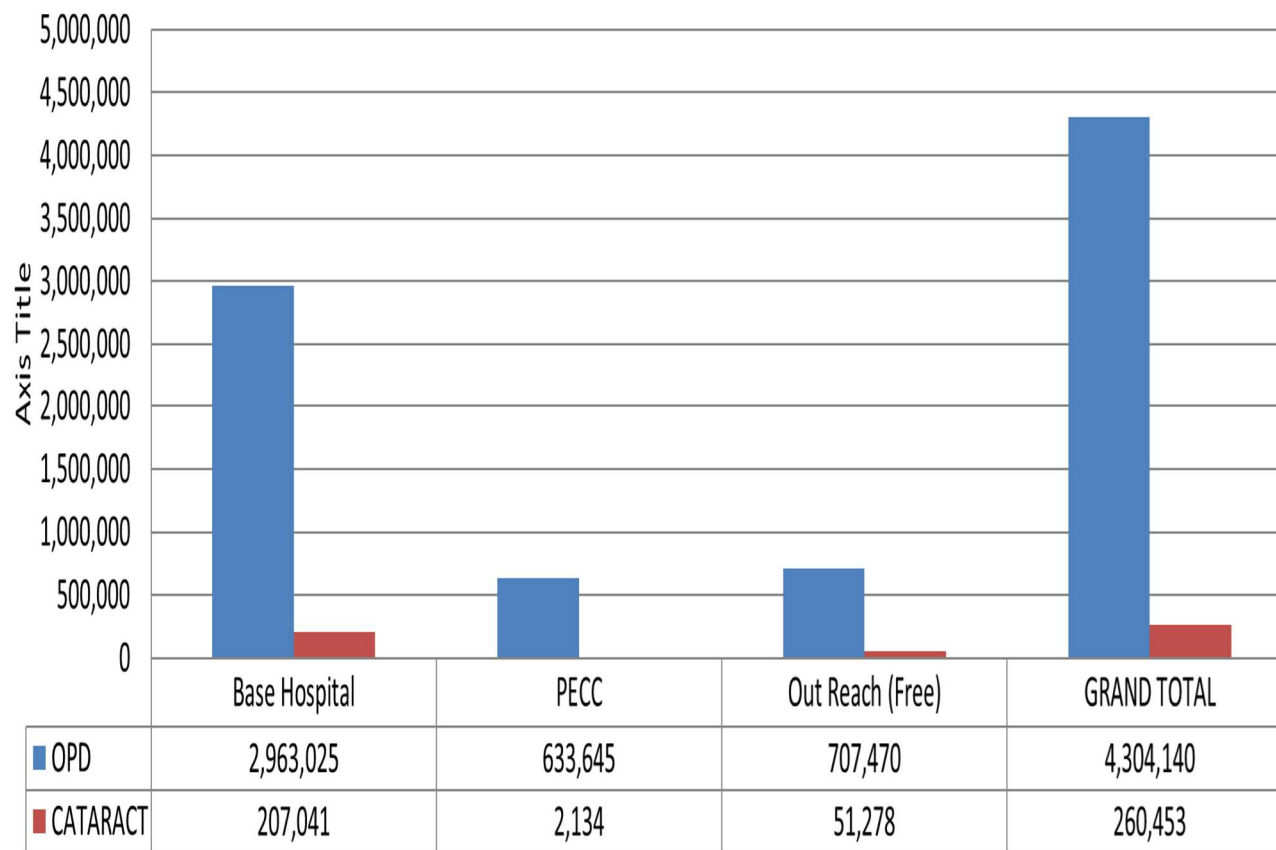

SERVICE

**4.30 Million
People**

Cataract Surgery

**0.26 Million
People**

CUMULATIVE FIGURE- 1986 TO 2024

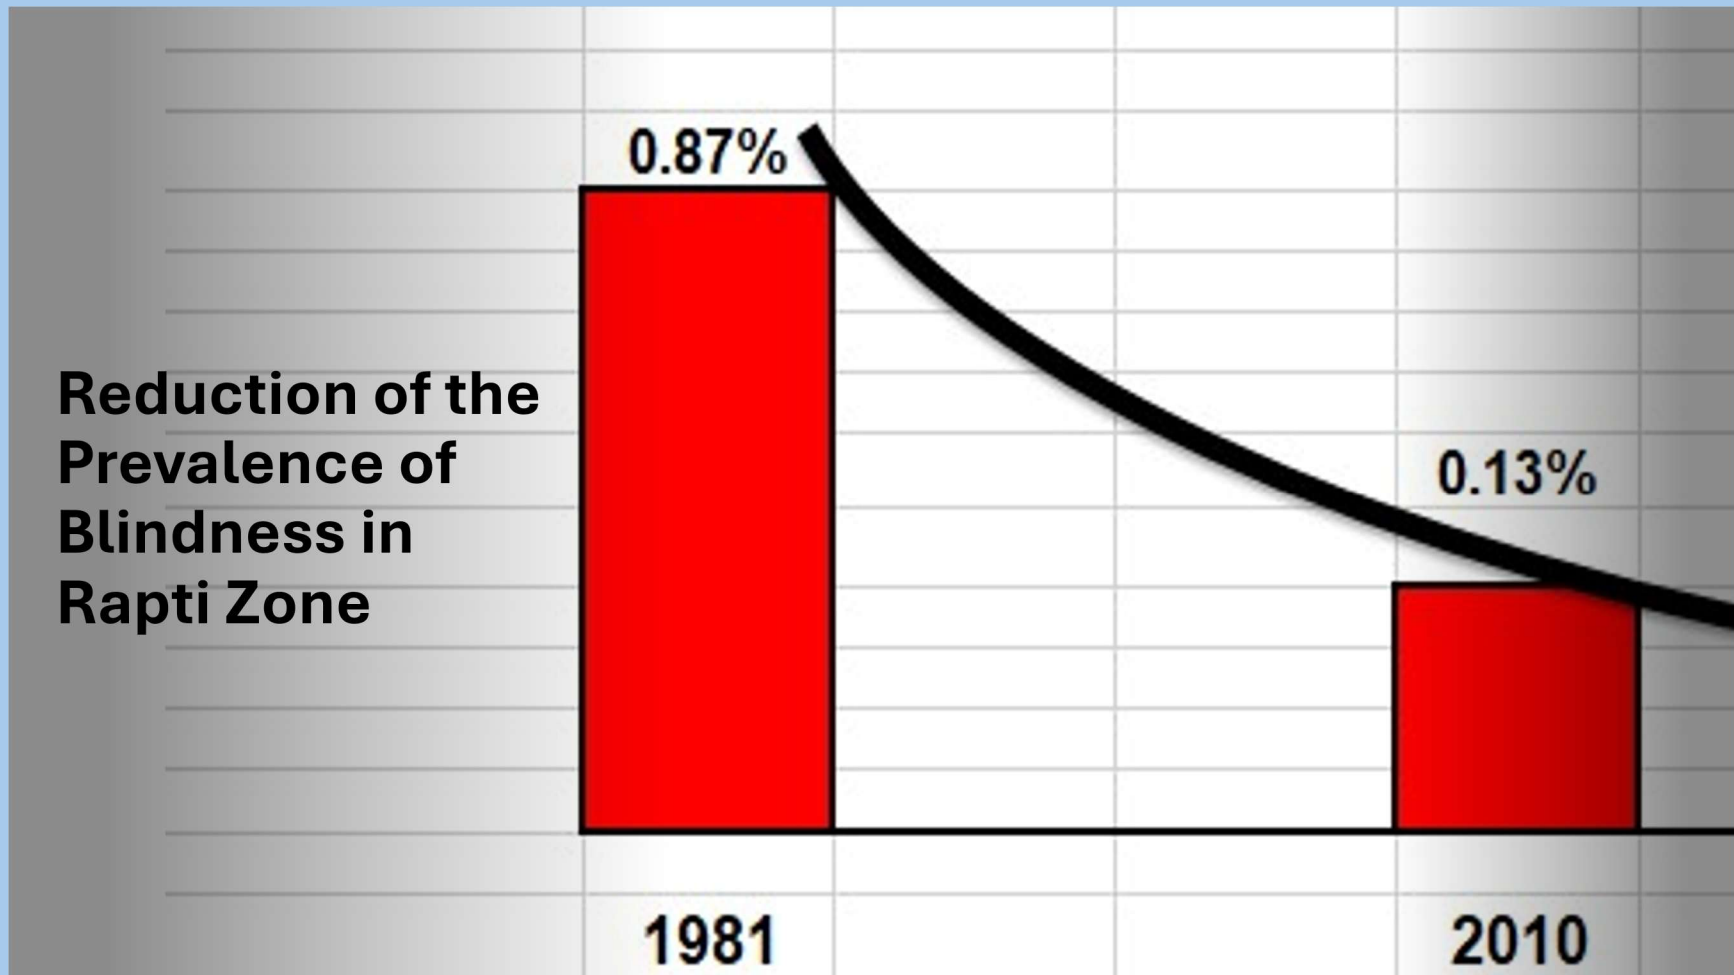

the program has delivered a total of **4.30 million** eye care services, restoring vision in **0.26 million** patients through cataract surgery. Among these, **0.70 million** services and **0.05 million** cataract surgeries were provided free of charge.

Free Eye Care
Services for 1.69
Million People, and
free cataract
surgeries to 50,000
Patients.

The program has provided free eye care services to 1.69 million people, including 50,000 free cataract surgeries.

Reduction of the Prevalence of Blindness in Rapti Zone

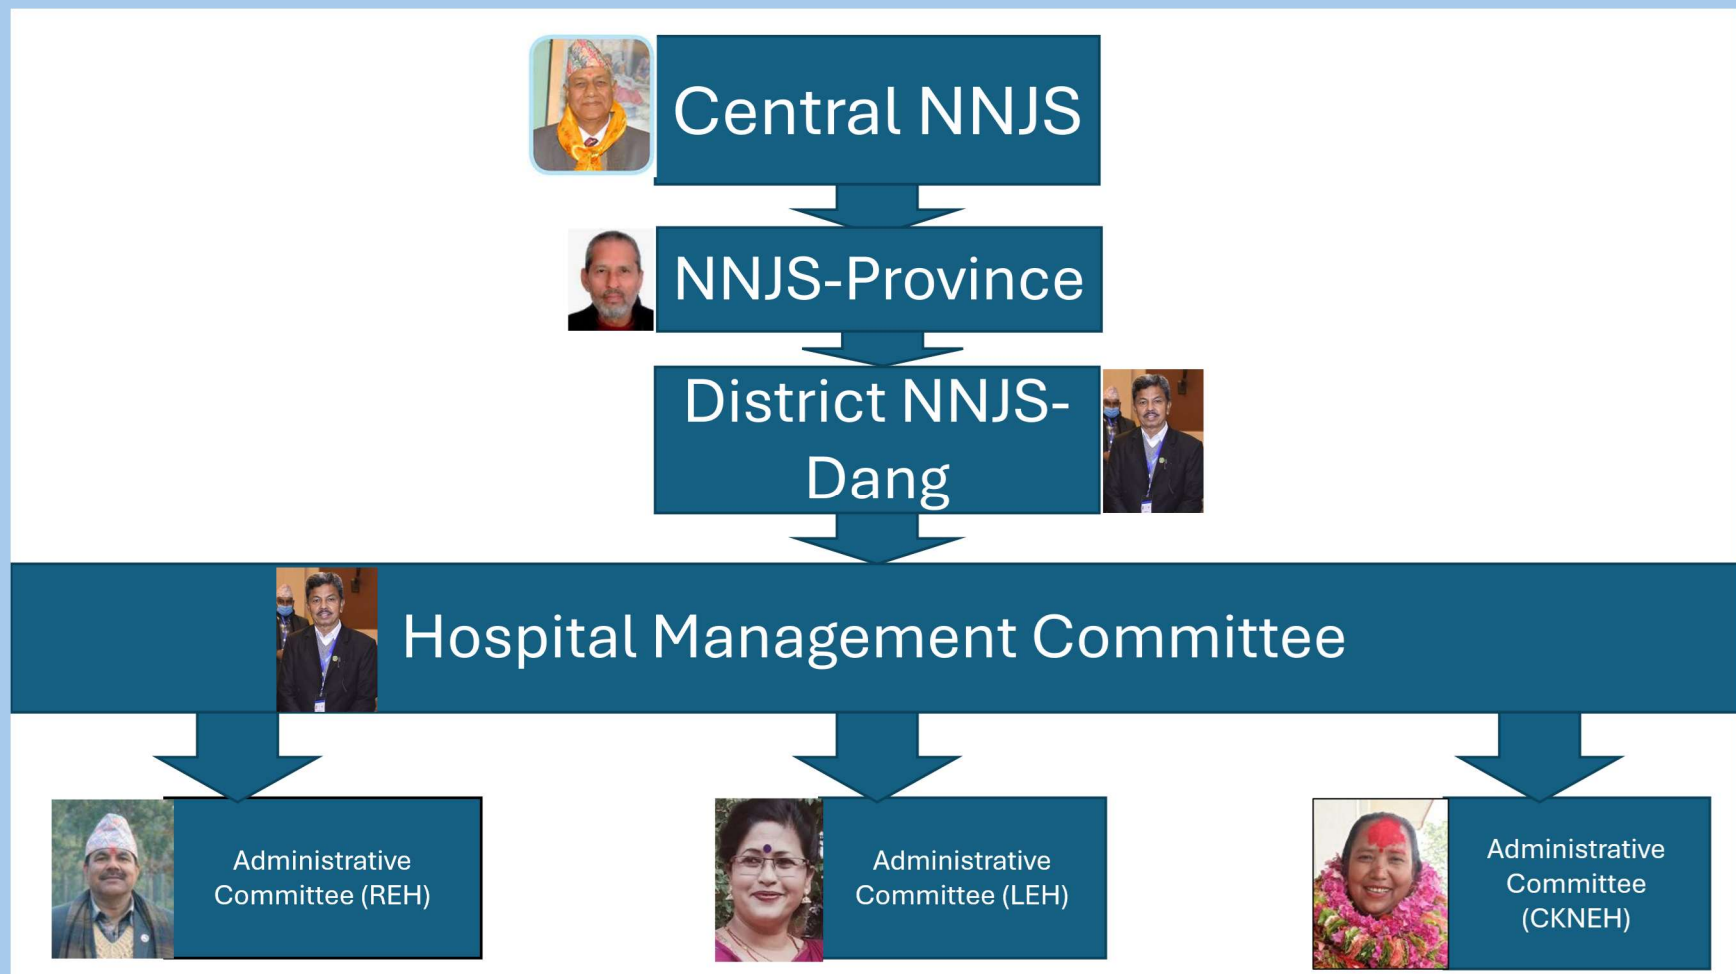

The results indicate that the prevalence of blindness in Rapti Zone has reduced from 0.87% to 0.13%.

A photograph of a woman in a red shawl giving a thumbs up, with white powder on her cheeks. She is smiling and looking towards the camera. In the background, other people are visible, some wearing head coverings. The image is partially obscured by a dark overlay on the left side where the text is located.

Our Strength

Behind all these achievements, there is a strong foundation supporting our success.

The program is supported by a strong management structure from the central to the ground level. Central NNJS develops policies and monitors eye health programs nationwide. Provincial structures oversee and supervise activities at the provincial level, while District Branches manage policy implementation, monitoring, and supervision of the eye health program. Hospital Management Boards implement central and provincial policies, approve programs and budgets, and develop bylaws. Day-to-day administrative activities are managed by three separate Administrative Management Committees under the hospital management.

**191 Plus dedicated
staffs and 12 plus
ophthalmologists
including one Professor**

Another major strength is the support of more than 191 dedicated staff members and over 12 ophthalmologists, including one Professor.

**Reduction of
Blindness
from 0.87% to
0.13%**

As a result, blindness in Rapti Zone has been reduced from 0.87% to 0.13%.

Annual Press Meet, Social Audit, Advocacy with
Ministry of Health-Lumbini Province.

Annual basic eye health education to Health Coordinator, Health Personal, VolunTERS.

Monitoring Visit of the OT Building at Rapti Eye Hospital by the Embassy of India.

Mass advocacy activities were conducted during a religious (Dharmik) festival in Rukum to raise community awareness on eye health and preventable blindness. The program utilized the large public gathering to disseminate key messages on early eye check-ups, cataract treatment, refractive error correction, and available eye care services. This approach strengthened community engagement and improved awareness of accessible eye care services in the region.

Advocacy – General Assembly of NNJS- Dang

International seminar- IAPB, Kathmandu, Nepal.

What motivates us ?

What motivates us is our commitment to improving eye health, restoring vision, and enhancing the quality of life for our patients, while continuously striving for excellence in care, innovation, and community service. In addition, we are guided by a strong vision, mission, and clear goals.

VISION
"Sight for all"

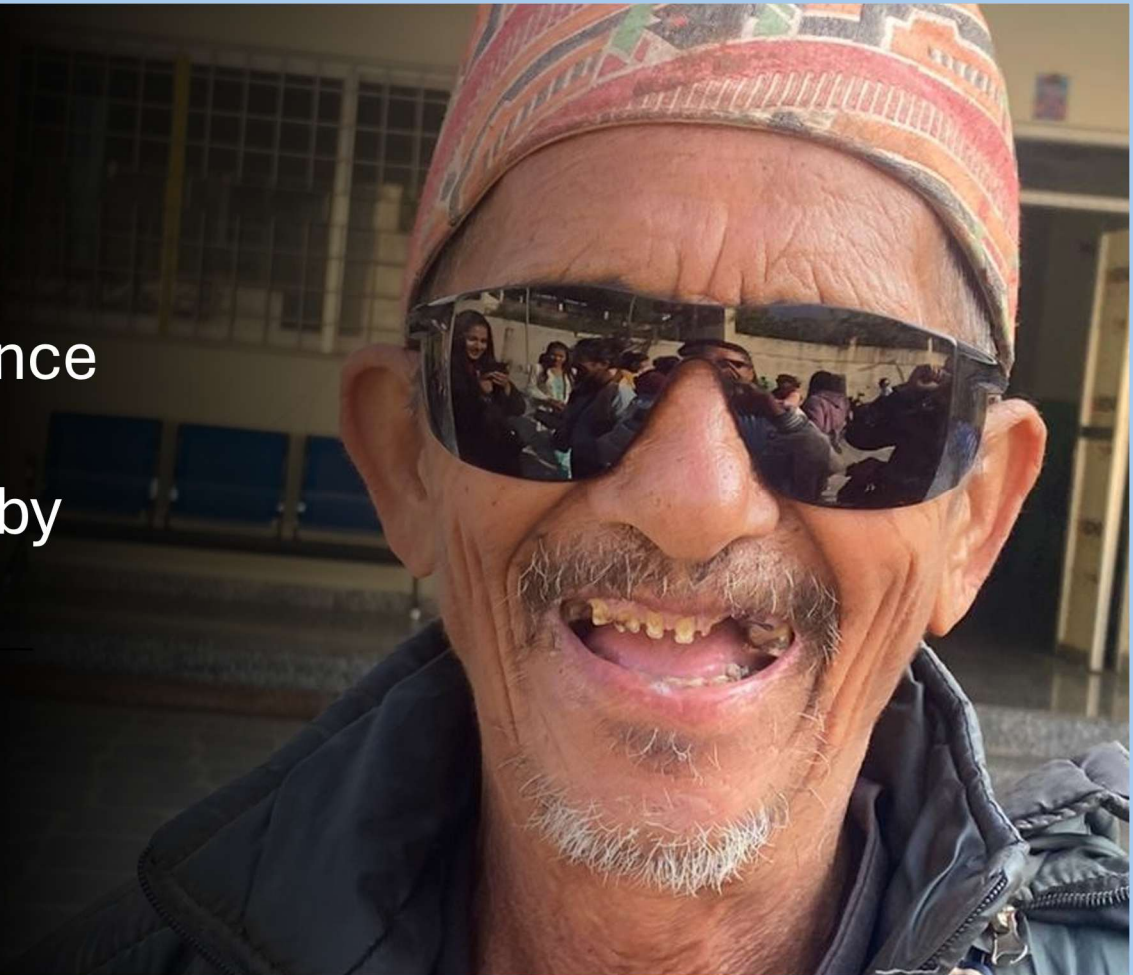

MISSION

Reaching to unreached with equitable & inclusive, affordable & accessible, high-quality, and patient-centered comprehensive eye-care services

GOAL

To reduce prevalence
of avoidable
blindness to 0.20 by
2030

SUCCESSFUL STORY

Restoring Vision, Restoring Life

At the age of eight, Humrat gradually lost his eyesight due to untreated cataracts. Lack of awareness and poverty delayed proper medical care, and he lived for years in darkness, facing isolation, stigma, and hardship. With encouragement from the community, Humrat visited Rapti Eye Hospital, Tulsipur. After examination, he was diagnosed with cataracts. Despite financial constraints, the hospital ensured free registration, investigations, and cataract surgery with support from NABP- Norway. The surgery was successfully performed by Dr. Ranjit Kumar Shah and Dr. Chandra Shekhar Sharma. After surgery, Humrat regained his vision and saw the world clearly for the first time. Today, Humrat is studying in Grade 12 and dreams of becoming a teacher. His journey reflects how timely eye care, community awareness, and free services can transform lives and break the cycle of blindness and blind faith.
